PREVIOUSLY SLIGHTLY ANNOUNCED UNANNOUNCED WHAT HAVE I LEARNED? EXERCISE

1. Briefly describe the chain of events taking place in the cardiac cycle, and how they are related to different characteristic patterns of the ECG. Do mention which chambers, valves, arteries / veins that play a major role in the cardiac cycle (40)

2. Briefly describe what different lead configurations are used in ECG, how many do we need at a minimum to describe the heart’s electrical activities, and why do we use more than that number? (30)
3. Describe in no more then three sentences each, different techniques used for measuring blood pressure. Make sure that you include at least 1 direct measurement and 2 (or 3) indirect measurement techniques. (30)
