

**IEEE Transactions on Instrumentation and Measurement**

**Overlength Page Charge Agreement**

I understand that the free-publication limit for the *Transactions on Instrumentation and Measurement* is eight (8) pages (effective January 1, 2008) for all issues.

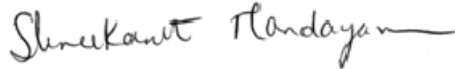

I Shreekanth Mandayam agree, or my organization \_\_\_\_\_ agrees, to pay a mandatory overlength page charge of \$200 for each page or fraction thereof beyond the free-publication limit, to publish the paper entitled

Virtual Reality Environments for Integrated Systems Health Management of Rocket Engine Tests

I understand that I will be billed directly by the IEEE and after the publication of the paper, should such charges be necessary.

The overlength page charge may be waived by the Editor-in-Chief in special cases (such as invited state-of-the-art review articles, etc.) and ONLY by prior agreement.
