The screenshot shows the World Bank Data Catalog interface. At the top, the World Bank logo and tagline 'Working for a World Free of Poverty' are visible, along with language options (English, Español, Français, العربية, Русский, 中文) and a search bar. The main navigation bar includes 'Home', 'About', 'Data', 'Research', 'Learning', 'News', 'Projects & Operations', 'Publications', 'Countries', and 'Topics'. The 'Data' section is highlighted in red.

The page title is 'Access to electricity (% of population)'. Below the title, there are buttons for 'DATABANK', 'DOWNLOAD DATA', and 'SHARE'. A description states: 'Access to electricity is the percentage of population with access to electricity. Electrification data are collected from industry, national surveys and international sources. World Bank, Sustainable Energy for All (SE4ALL) database from World Bank, Global Electrification database. License Open. Catalog Sources World Development Indicators. View in WDI Tables'.

The main content area features a world map showing the percentage of the population with access to electricity. The map is color-coded in shades of red, with a legend indicating a scale from 5% to 100%. Above the map, there are time period filters: 1981-1985, 1986-1990, 1991-1995, 1996-2000, 2001-2005, 2006-2010, and 2011-2015. The 2011-2015 period is selected. The map also has a 'Shaded' vs 'Points' toggle and a zoom control on the left.

On the left side, there is a sidebar with a search bar and a list of 'Featured indicators' under the 'Environment' category. The indicators listed are: 'Access to electricity (% of population)', 'Agricultural methane emissions (% of total)', 'Agricultural nitrous oxide emissions (% of total)', 'CO2 emissions (kt)', 'CO2 emissions (metric tons per capita)', 'Energy intensity level of primary energy (MJ/\$2011 PPP GDP)', and 'Fish species, threatened'.
