

Mirrors: Plane, Concave, and Convex

Purpose: To provide visual demonstration of the properties of flat, concave and convex mirrors.

Location: room 146, shelf O6 (assorted plane mirrors and a round, concave “makeup” mirror)(left photo); large concave and convex mirrors (with explanatory manual) are on old ripple tank stand by wall adjoining room 144

These mirrors permit students to observe the properties of the different kinds of mirrors.

(Safety Note: Do not expose the large concave mirror to direct sunlight, as it may concentrate it at a hot spot, possibly causing burns or a fire.)
